Experienced **Full Stack Developer** with **3+ years of diverse experience**. Skilled in a wide range of technologies and frameworks, with a strong work ethic and a passion for creative problem-solving.

📁 PROFESSIONAL EXPERIENCE

Webengage

Senior Solutions Engineer

05/2023
Gurugram, India

- Work on design and development of new products iteratively by building quick POCs for new product integration.
- Interact with both business and technical stakeholders to deliver high quality products and services that meet business requirements and expectations while applying the latest available tools and technology.
- **Designed and developed an event relay pipeline using AWS Lambda and Amazon SQS**, significantly enhancing data reliability by managing consumer rate limits, ensuring robust retries, and preventing data loss.
- **Developed a robust CMDB Dashboard backend**, implemented Role-Based Access Control (RBAC) and REST APIs, resulting in Managing infra cost, deployments, modules, resources and services used in a feature at one place.

Solutions Engineer

05/2021 – 04/2023
Gurugram, India

- **Developed and maintaining a backend which is handling 30+ Integration pipeline** for different clients including **Adani, Unilever, Loreal and many more**. for seamless data transfer between Customer Relationship Management Systems (CRMS), data warehouses, and webengage, ensuring efficient data flow and integrity.
- Integrated ESP, WSP and SSP with webEngage using AWS Lambda which is **handling millions of messages sent through webengage everyday**.
- **Integrated platforms like zendesk, JIRA, rocketlane** etc. with our internal systems for data sharing.
- **Worked on nunjucks** (a JavaScript-based templating language) for content personalisation.
- **Converted over 200+ Photoshop Document Designs into Mobile Responsive Surveys, Notifications** etc. using HTML, CSS and JavaScript.
